QUESTIONS TO DISCUSS WITH YOUR SCHOOL

- ✓ How is your district doing compared to other districts with similar characteristics? What reasons might there be for any differences that may exist? Is your district performing above or below the state average?
- ✓ What other indicators of academic performance are available (such as the number of students enrolled in gifted, arts or foreign language programs; the number of students taking Advanced Placement classes; students' performance on college entrance exams, etc.)?

District Results by Gender and Ethnicity

This table presents the district's results broken down by gender and ethnicity. Disaggregating the data enables policy makers, school officials and other education professionals to focus on an area of concern and then create a solution or intervention. In addition, trends over time may be analyzed to see if the intervention strategies have helped in reducing the gap.

QUESTIONS TO DISCUSS WITH YOUR SCHOOL

- ✓ How does each individual group's performance results compare to your district's overall results for all students?
- ✓ Are there differences in the performance results of different groups of students?
- ✓ If yes, what factors might be contributing to those differences?
- ✓ What can be done to address the differences and to raise all students' performance to satisfactory levels?
